

then presented the certificate to another coworker.

Also during the Town Hall, Charles Lawton from the Cylinder Reclamation and Refurbishment shop, Robert Crawley from DDRV's flammable warehouse, Julie Harris from Bin Operations, and Ambrose Brown from the Outloading Terminal received their choice of home fire extinguishers, carbon monoxide detectors, or smoke alarms for their outstanding safety records.

DDRV Deputy Director Tim Radford said, "When it comes to quality, I wish we could clone Glenn Jones and have him placed with all the vendors that ship hazardous material to us. His finished products are spot on."

Bross, Gregory recognized with DDOO Commander's Excellence Award

By Rosalie Lindley, DDOO

Defense Distribution Depot Oklahoma City, Okla. (DDOO) Supply Technician Sharon "Sherry" Bross is recognized by DDOO Commander Col James Reiman, USAF, for the exemplary manner in which she completes her duties. She provides timely and accurate inventory support to correct accountable records and manages the Open Stow/Rewarehouse/Location Surveys/Lost or Found

Material Research Over \$1,000 Program. She maintains an excellent rapport with employees and managers through the depot. Sherry always goes above and beyond assisting personnel throughout the depot with processing problems and providing customer support to on-base and worldwide customers.

Bross participates annually in the Combined Federal Campaign generously donating to the Habitat for Humanity.

She also attended college at Oklahoma State University and University of Central Oklahoma, majoring in Special Education and Psychology.

DDCT top performers recognized by DSCR Commander

By Will Daniel, DSCR Public Affairs

CAPT Mark F. Heinrich, SC, USN, Defense Supply Center Richmond (DSCR) Commander, visited Defense Distribution Depot Corpus Christi, Texas (DDCT), in December and congratulated its employees on a job well done in support of the Army's Lean initiatives.

DDCT provides more than 181 different types of pre-assembled hardware kits designed to support airframe and component programs.

DSCR manages kit assembly at DDCT in direct support of the Army's Aviation and Missile Command and Corpus Christi Army Depot (CCAD) aviation maintenance production lines.

CAPT Heinrich recognized two DDCT employees Patricia J. Maldonado and Alicia Lorenzo for outstanding performance in support of the kitting initiatives. He presented DSCR coins to the two "rock stars," as their Commander called them.

Maldonado, as the kitting manager, provides a communication link between the co-organizations, other depots, and the customer. She requisitions and accurately monitors and maintains tracking of all kit orders, assembling of

kits and processing the kits to the customer, said LTC Timothy Orner, USA, DDCT Commander.

Maldonado plans and analyzes forecasted and scheduled programs to support the Army's lean initiatives. She receives the material into the project consolidation and packaging application and completes consolidation of the kits into the distribution standard system.

Lorenzo is the kit assembler. Her recognition reflects her diligent efforts of project consolidation and packaging of kit component parts. That includes receipt induction, assembling of the kits, processing the end item and issuing the kit to the customer.

CAPT Mark Heinrich, SC, USN, DSCR Commander, presents a DSCR coin to DDCT's Patricia J. Maldonado in recognition of her work in kitting.

CAPT Heinrich presents a DSCR coin to DDCT's Alicia Lorenzo in recognition of her work in kitting.
